TB Ø50
Width : 70 -> 500

TB Ø24
Width : 20 -> 100

TB Ø90
Width : 600 -> 1200

The advantages of good design

Cleanliness and long-lasting
of the stainless steel
bedplate

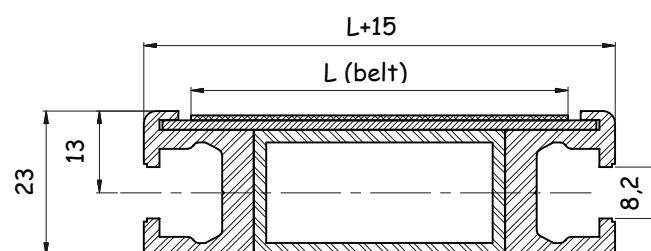

robust and compact anodized
Aluminium accessories

Accuracy in driving thanks
to Ø24 stainless steel
rollers

Belt widths : 20, 40, 60, 80,
100 mm -Belt types : low grip
PU or food quality, other
types on request

Rigidity of the structure
made of 23x17.5 anodized
Aluminium profiles (8mm slots
for 13mm square nuts)

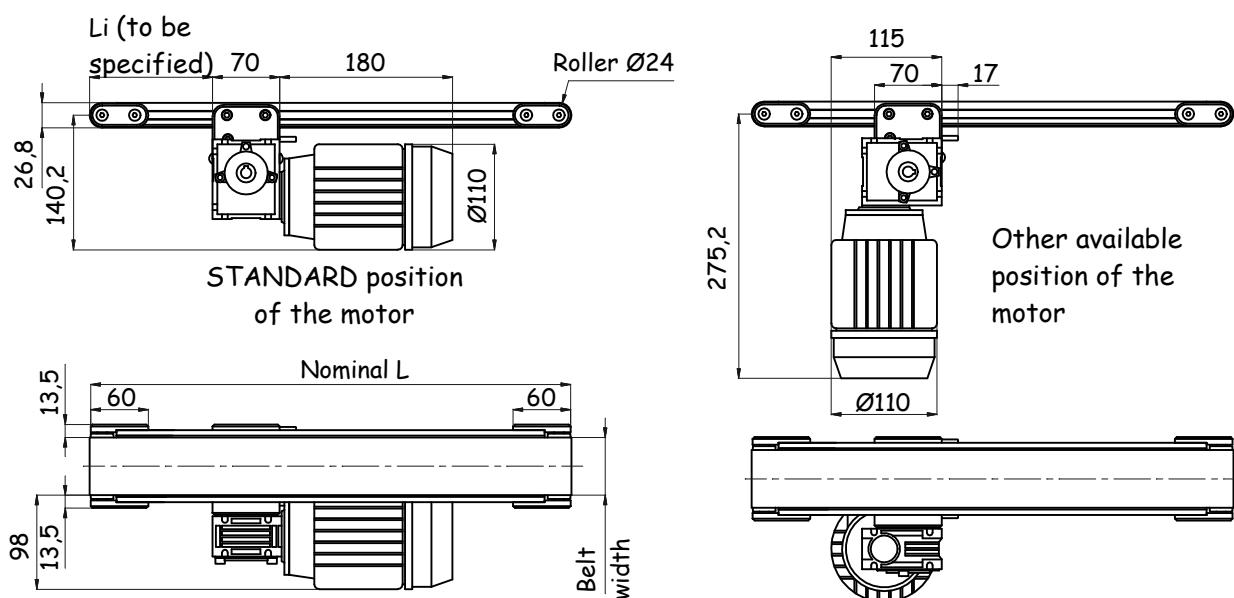

Wide range of available
speeds thanks to worm gear
motor (60W or 90W
230/400 V)
3 phased

MOTOVARIO Motorreducer	BELT WIDTH (mm)				
	20	40	60	80	100
Intermediate Drive	2442	2444	2446	2448	2440
PUBA belt	2472	2474	2476	2478	2470
PUAL belt	2462	2464	2466	2468	2460

overall maxi. Length : 6000mm

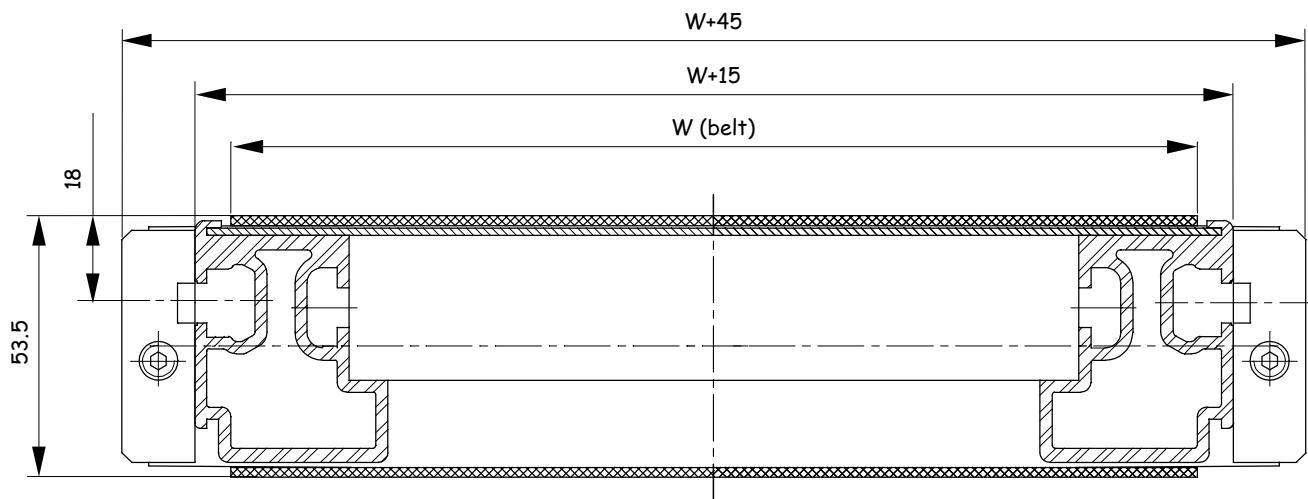

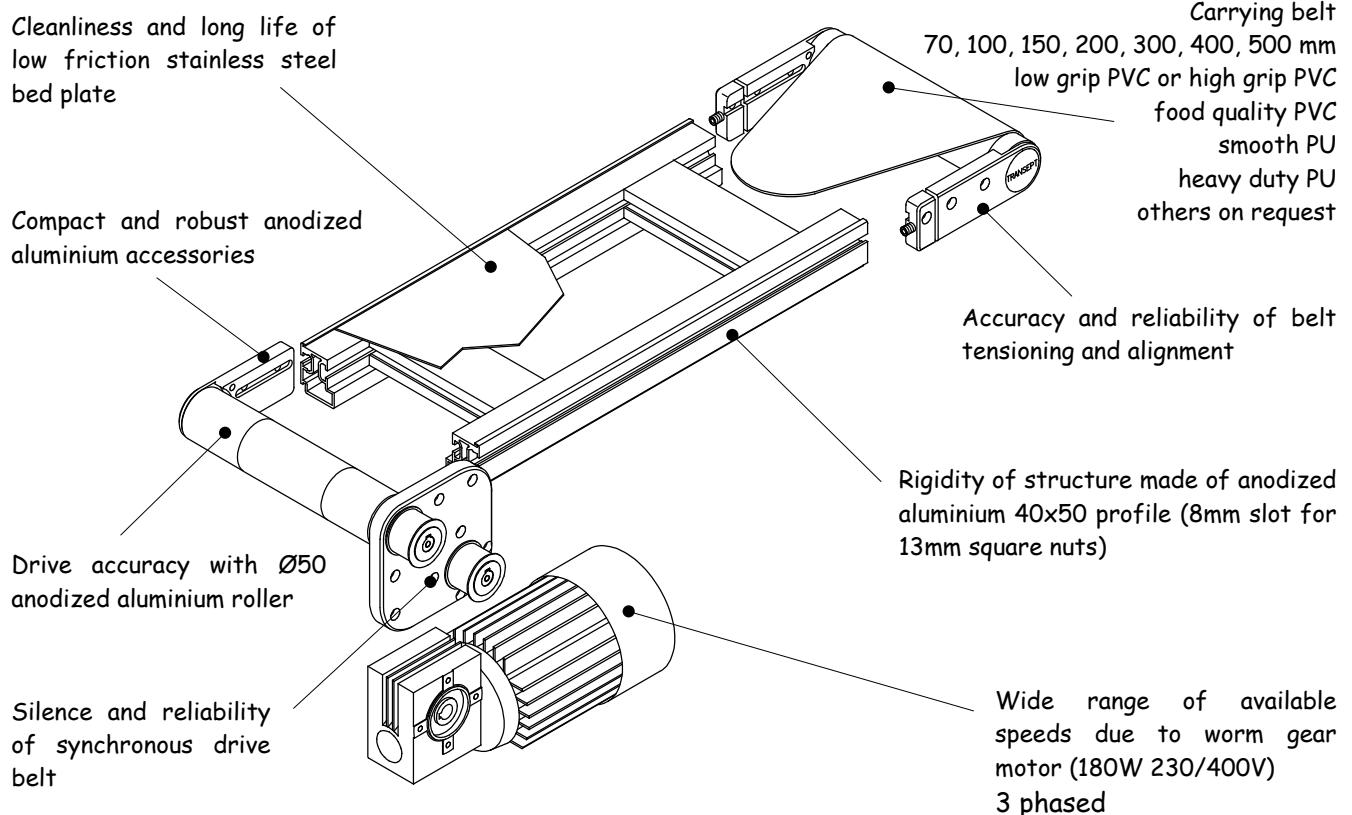

Type de belt	Ref.	thn. (mm)		T _{adm}	FDA	Utilisation
Low grip PU belt (green)	PUBA	0,8	yes	100°C	no	transportation, inclination limited at 5°, possible accumulation
Food quality PU belt (white)	PUAL	0,8	no	100°C	yes	
Other types on request						

« STANDARD » SPEEDS								
Motorreducer ratio	I=60	I=50	I=40	I=30	I=20	I=15	I=10	I=7,5
Speed of the belt (m/min)	1,8	2,2	2,7	3,6	5,4	7,2	10,9	14,5
Reference to be ordered	2400	2401	2402	2403	2404	2405	2406	2407
								I=5 2408

IMPORTANT : consider the indicated speeds (m/min) with a precision of +/-10% at the 50Hz frequency (current supply). The use of a frequency inverter allows to select a range of speed between 50% and 150% of the nominal value indicated at 50Hz.

The advantages of good design

The nominal lengths of the belt conveyor are shown in a non-tensioned state (except in the case of the intermediate drive).

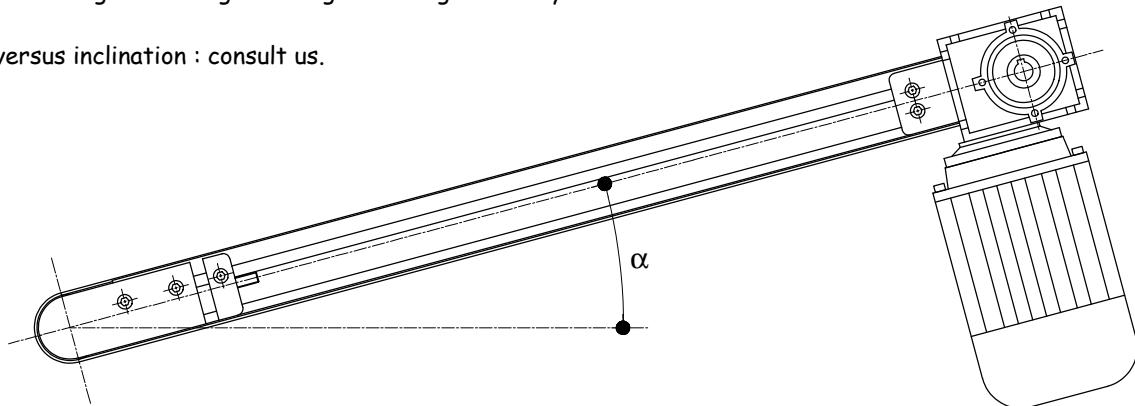

Initial tensioning of the belt during assembly will result in an increase in length of between 0.25% and 0.30% of the conveyors nominal length (i.e. from 2.5mm to 3mm for each conveyor meter).

With maximum tension applied to the belt an increase in length of 0.5% will be observed (i.e. 5mm for each conveyor meter).

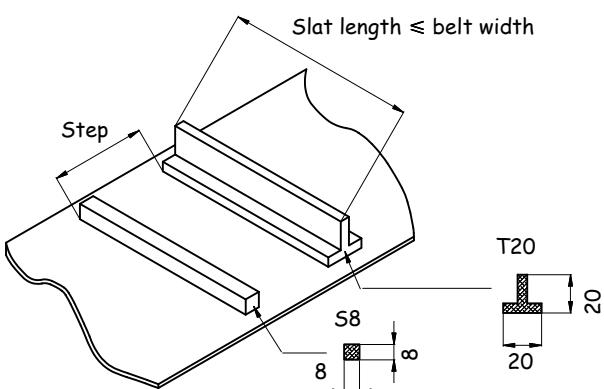

Overall maximum length : **6000mm** (bigger on special request).

Allowable loading from 40kg to 100kg according to conveyor width.

Speed versus inclination : consult us.

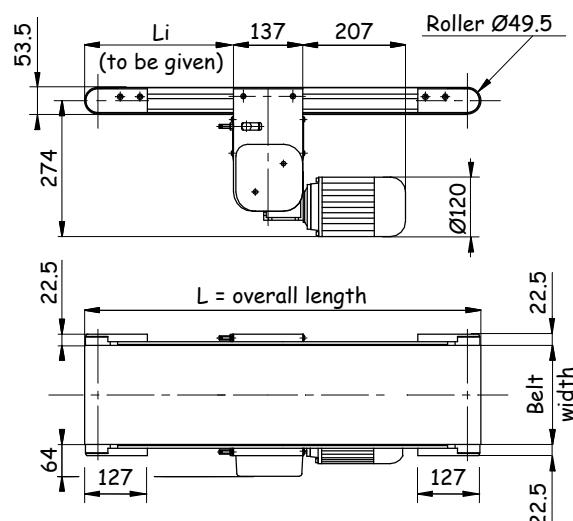

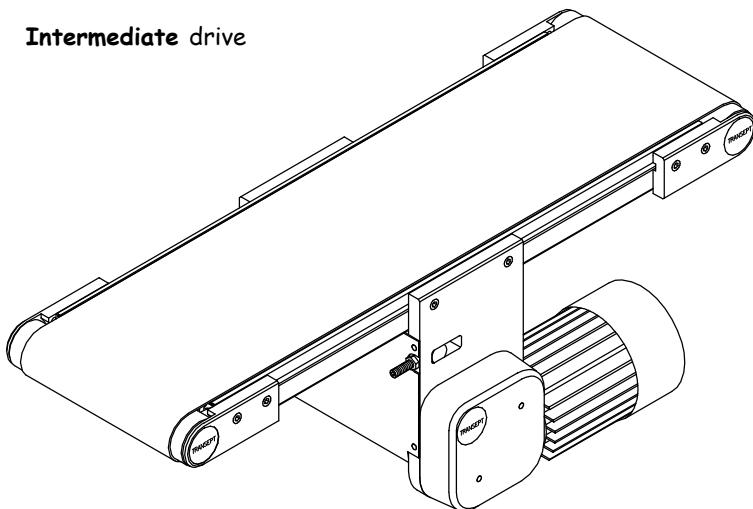

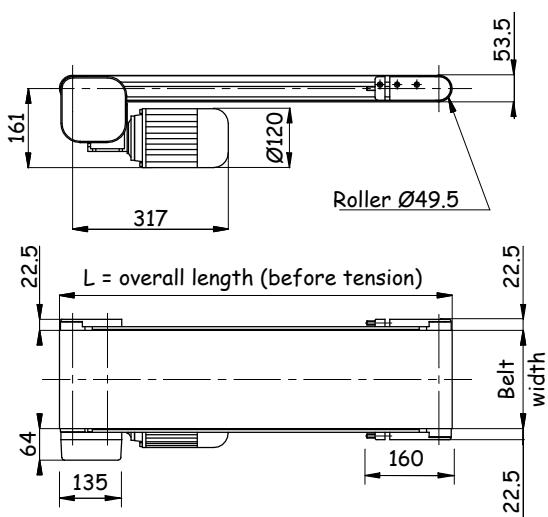

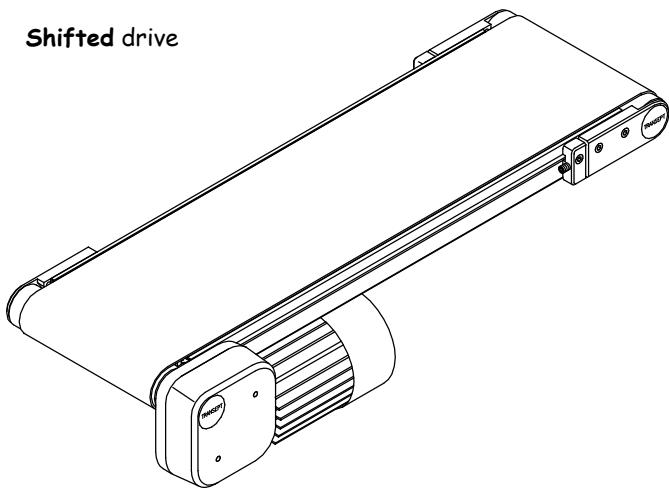

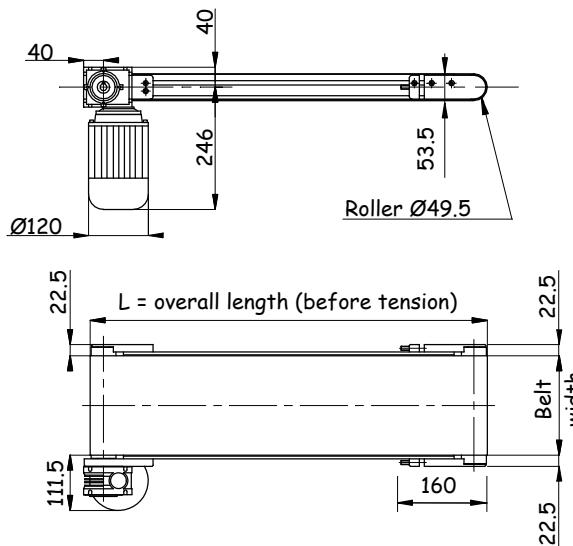

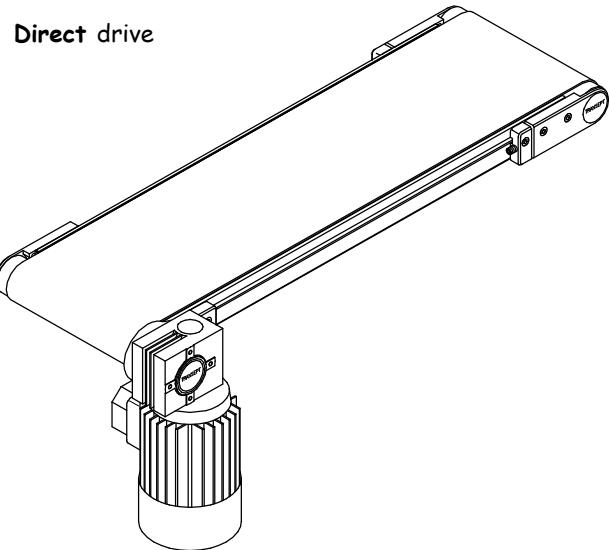

Available belts	Ref.	Th. (mm)		T _{max}	FDA	Utilisation
Low grip PVC (black)	PVCL	1,8	yes	60°C	no	Carrying (α up to 5°), accumulation is possible
High grip PVC (dark green)	PVCA	2,5	yes	60°C	no	Carrying (α up to 30°), accumulation is impossible
« food quality » PVC (white)	ALIM	2,0	no	60°C	yes	Carrying (α up to 10°), accumulation is allowed
Smooth PU (dark green)	PUBA	1,6	yes	100°C	no	Carrying (α up to 5°), accumulation is possible
PU heavy duty (green)	PUAD	2,3	yes	100°C	no	Carrying (α up to 10°), accumulation is allowed
Other belts (translucent, high temperature,...) on special request						

SLATS

IMPORTANT : only PUBA belt may accept slats. Please, indicate step or slat number. Choose preferably ODD number.

IMPORTANT : consider the indicated speeds (m/min) with a precision of +/-10% at the 50Hz frequency (current supply). The use of a frequency inverter allows to select a range of speed between 50% and 150% of the nominal value indicated at 50Hz.

Belt conveyor TB Ø50

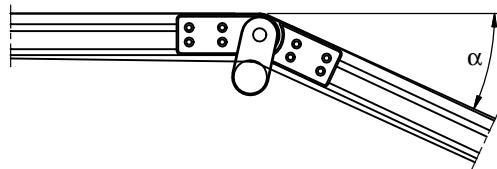

Adjustable articulation

Angle value : adjustable from 0 to 60°

Upward articulation

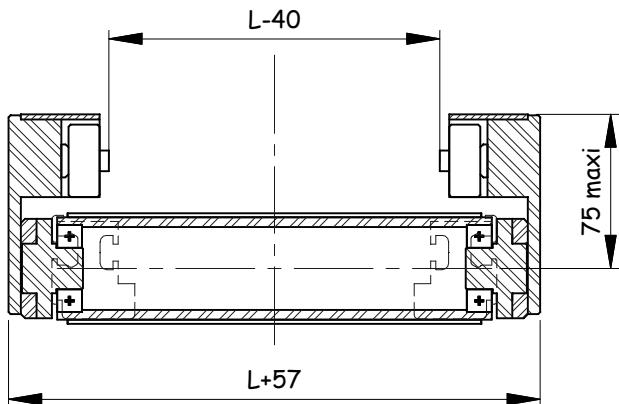

Downward articulation

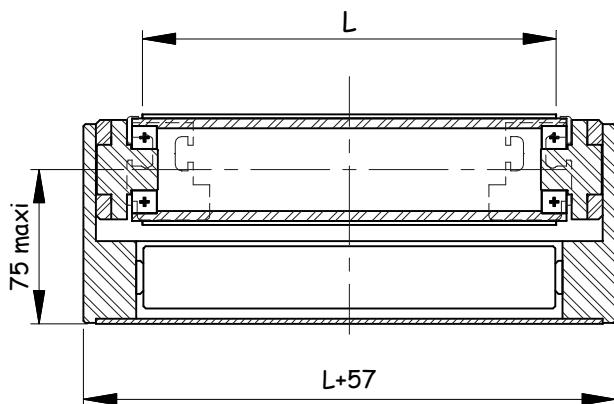

Low grip belt conveyor

L = Belt width

Upward articulation

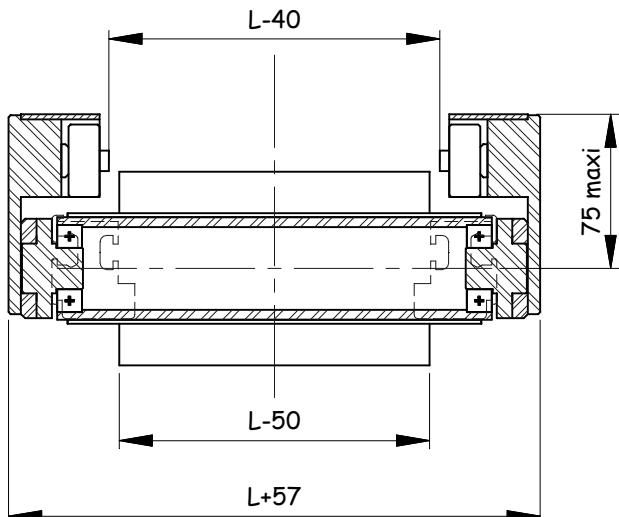

Downward articulation

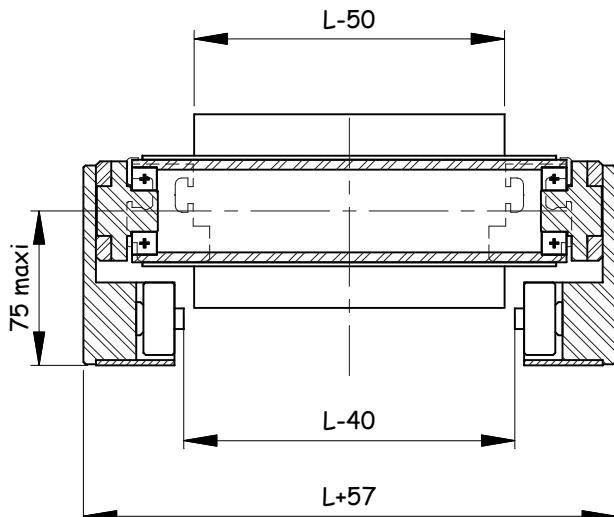

Slat type belt conveyor

L = Belt width

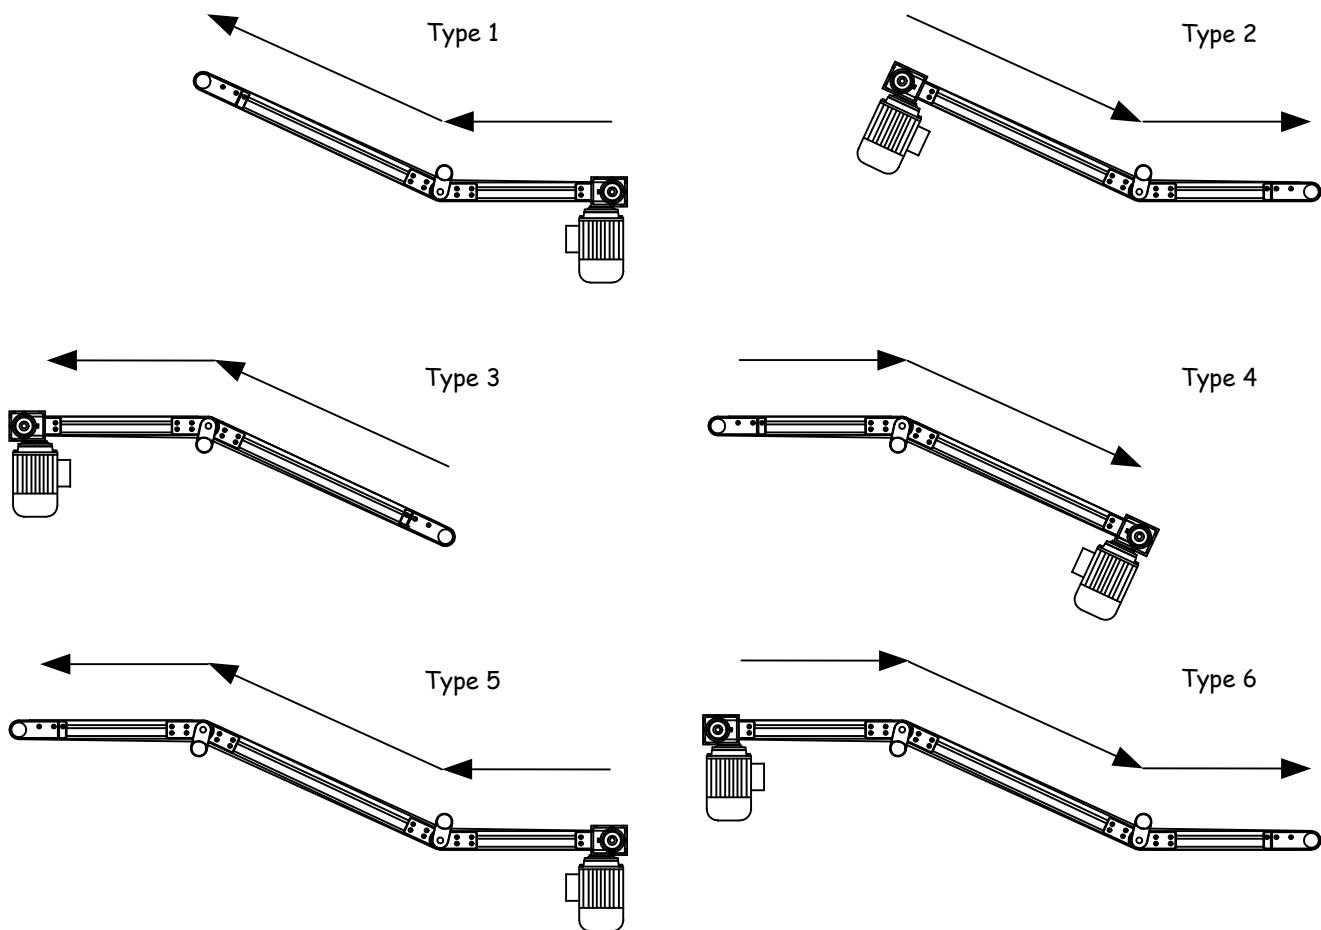

Upward articulation

Downward articulation

Advisable position of motors

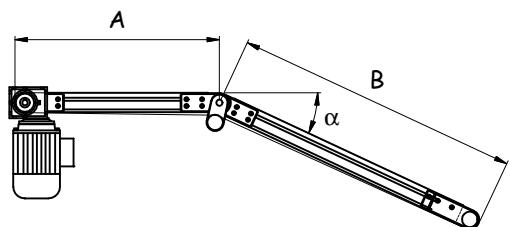

Type of motorization

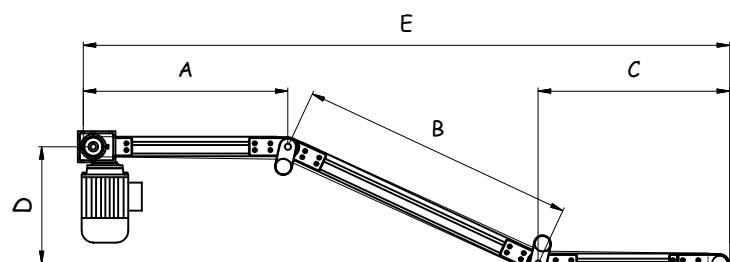

3 types of drive available : direct, shifted and intermediary
direct drive is necessary with slats or content edges

dimensions to be specified in case of order

one articulation conveyor

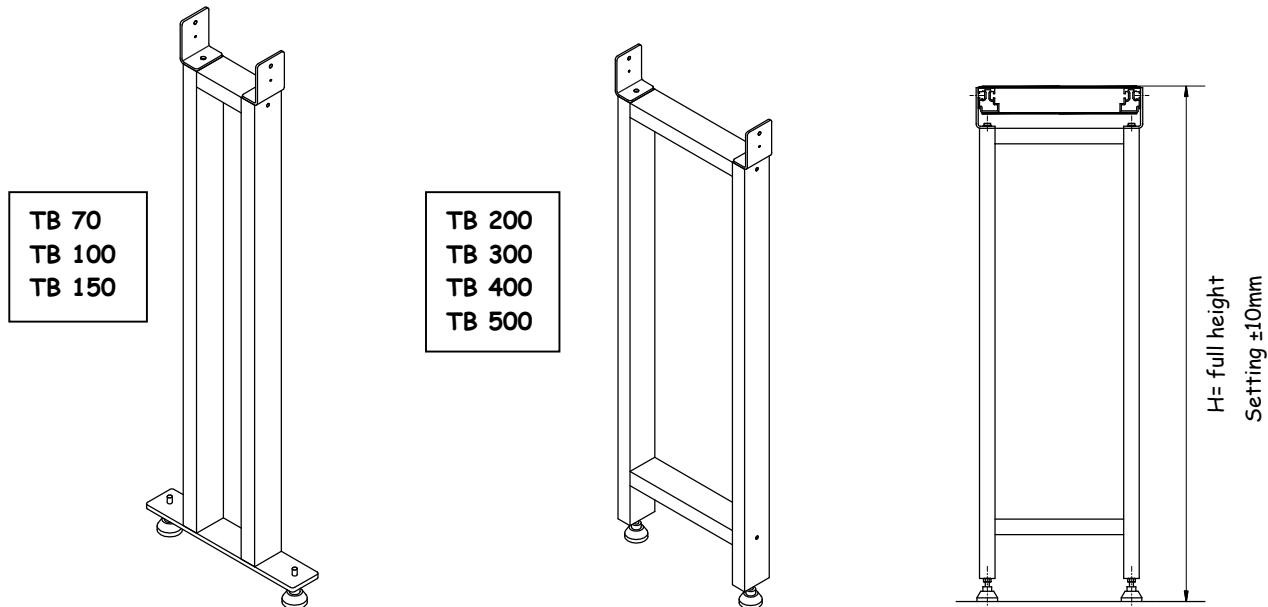

two articulation conveyor

Conveyor width	width 70	width 100	width 150	width 200	width 300
Articulation reference	3076	3106	3156	3206	3306

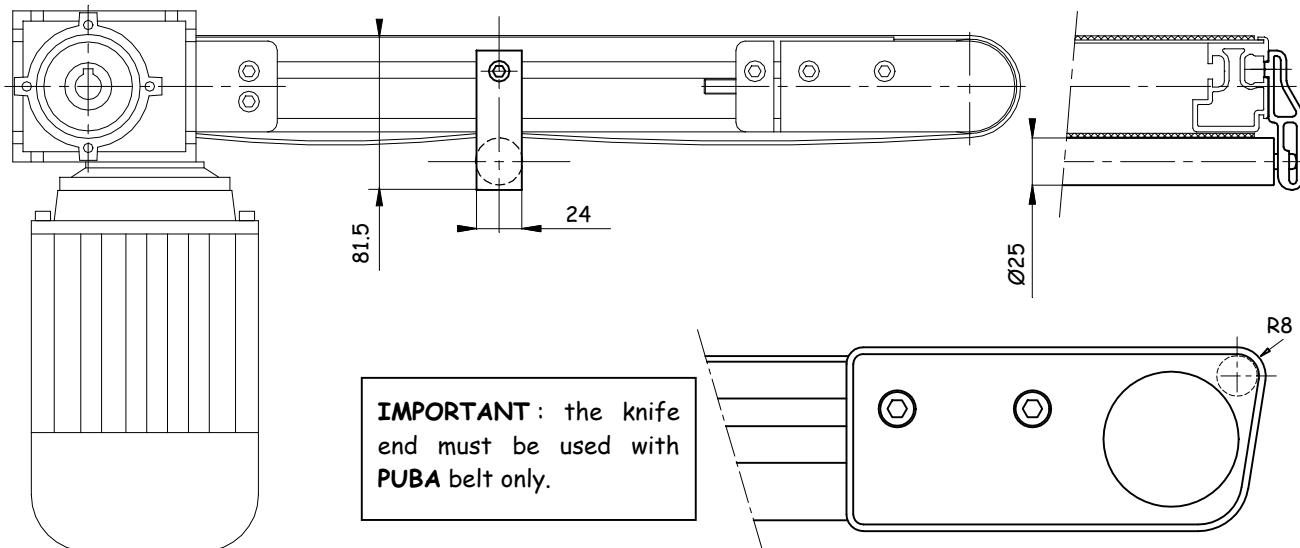

The developed length of a conveyor should not exceed 6 meters
For any conveyor length above 2500mm, a support roller is necessary
please contact us for any width above 300 mm

Leg sets : aluminium profiles 30x60, 3 slots 8mm for rectangular nuts.
